

# Ir Through Terminal Board

# TY-FB9RT

## ■ Product summary

As the infrared signal received at the remote control optical receiver on the display unit is re-emitted, it is possible to control devices such as VCRs and DVD recorders which have been installed in places that the remote control signal cannot reach.

- Only one terminal board can be installed on a display.
- This terminal board is intended for use with Panasonic devices.
- The carrier frequency of the remote control signal is 36.7 KHz.
